

New Trolldtekt® colour: Clay

Give your acoustic panels the distinctive warm tone of clay.

Achieve a uniform look with a warm tone

Our new Clay colour is particularly suitable for painting acoustic panels based on FUTURECEM™ cement. Panels achieve a uniform colour with a warm glow.

Calcined clay helps give the new FUTURECEM cement type a lower carbon footprint than traditional cement. Clay also gives the cement a distinctive warm tone, which is clearly evident in the unpainted Troldekt panels based on FUTURECEM. However, the colour can vary considerably in individual panels and across the entire ceiling surface.

Troldekt is now launching a completely new colour – we call it Clay 210 – suitable for painting Troldekt panels based on FUTURECEM. The paint ensures a uniform look while preserving the characteristic tone of the clay.

Cradle to Cradle

The entire range of Troldekt cement-bonded wood wool products in natural wood/natural grey and painted in standard colours is certified at Gold level in accordance with the circular Cradle to Cradle Certified® design concept.

An acoustic solution with a distinctive design

When you choose Troldekt based on FUTURECEM, you're free to design ceilings and walls according to your own wishes.

Troldekt based on FUTURECEM is available in several different standard and special colours:

Clay 210

Grey 202

Grey 208

Black 207

Custom colours

Design

You can get traditional Troldekt acoustic panels and Troldekt design solutions series based on FUTURECEM. This also makes it possible to get the different types of panels painted in the new Clay colour.

Troldekt curves based on FUTURECEM, Clay 210

New type of cement – even more advantages

Choose acoustic panels with a reduced carbon footprint

Over their entire product life cycle, the carbon footprint of Trolldtekt acoustic panels based on FUTURECEM is:

- > 26 per cent lower than that of Trolldtekt based on grey cement
- > 38 per cent lower than that of Trolldtekt based on white cement

You achieve exactly the same good acoustics, effective fire protection and durability as with classic Trolldtekt panels.

Order your sample

Would you like to order samples of Trolldtekt based on FUTURECEM in the new Clay 210 colour? Then contact Trolldtekt at salg@trolldtekt.dk or fill out the form at
